ABOUT ME

Junior Full-Stack Developer with a strong foundation in web technologies (JavaScript, PHP, SQL, Node.js) and hands-on experience building responsive applications. Recently, I expanded into mobile development, creating an Android app with Kotlin and Jetpack Compose as part of a 7-day technical challenge, and I am currently developing a new project focused on Vue.js and modern web development. I have experience with frameworks such as Angular and Laminas, as well as tools like Docker and Git. Fluent in English and Portuguese, with a strong ability to adapt, self-learn, and deliver under tight deadlines.

WORK EXPERIENCE

[20/06/2025 – Current]

Web developer

• Built the core structure of the application using Vue.js, including the homepage and navigation system, following the MVVM methodology to ensure clean, scalable, and maintainable code.

• Designed the application's visual identity and layout, creating a consistent UI to enhance usability and user experience.

• Developed the Accommodations pages, integrating and synchronizing data from two external APIs, ensuring accurate and unified information across the platform.

• Implemented the Accommodation Details page, providing users with structured and relevant information sourced from the combined API data.

• Created the Casinos page, expanding the platform’s content and ensuring it aligned smoothly with the overall design and data flow.

Bestgest, Maintarget

[07/08/2023 – 28/11/2023]

Freelancer

• Collaborated with support and business teams to resolve 15+ critical tickets, including dashboard discrepancies, commission recalculations, and access logic fixes.

• Upgraded and refactored 8,000+ lines of legacy code during the migration to a newer PHPExcel version, ensuring accurate data exports.

• Implemented new business rules for commissions and dashboards, enabling accurate KPI tracking and ensuring compliance with updated revenue models.

• Designed and deployed a Month Locking System for commercial and financial teams, preventing unauthorized activity updates and reducing reporting inconsistencies.

Bestgest, Maintarget

[04/02/2023 – 26/07/2023]

Web Developer Intern

• Transitioned 3 legacy projects from Zend to Laminas Framework using PHP, JavaScript, JQuery, Bootstrap, and MySQL, improving maintainability and modernizing legacy code.

• Developed and enhanced the company’s central authentication system, implementing multiple new features:

– Built an Apps Module supporting CRUD operations for application management, used by 50+ employees to access Maintarget Group applications.

– Extended the Dashboard with single sign-on iframe logins, streamlining user navigation across business areas and reducing login steps by 60%.

– Implemented user activity logs with device, IP, and browser tracking, optimizing load performance by moving high-volume records into a dedicated view.

– Created a Documentation Platform with recursive navigation, tag-based search, and SQL triggers for version history, improving accessibility across 20+ business applications.

• Delivered SMS verification system for client phone numbers across multiple projects, ensuring secure customer validation in 100% of stores with active verification enabled.

• Resolved 20+ development tickets, including contract field restructuring, commission recalculations, dynamic report generation with PHPExcel, and multiple bug fixes, directly improving system reliability and client satisfaction.

Limifield, Lda

[02/2020 – 07/2020] **Intern**

• Maintained and updated inventory records of 2000+ IT equipment, ensuring correct descriptions and details for new item requests.

• Managed purchase requests, verifying that orders were properly processed and communicated to the storehouse.

• Handled documentation flow, ensuring records were delivered to the manager for approval and tracking.

EDUCATION

[16/11/2025 – Current] **Course in Cybersecurity**

IEFP

City: Braga | **Country:** Portugal |

[09/2021 – 07/2024] **Higher Professional Course in Web Development and Multimedia**

Instituto Politécnico do Cávado e do Ave

City: Barcelos | **Country:** Portugal | | **Final grade:** 16

Technical Course in Management and Programming of IT Systems

Escola Profissional do INA | OFICINA

City: Santo Tirso | **Country:** Portugal |

LANGUAGE SKILLS

Mother tongue(s): Portuguese **Other language(s):** English

SKILLS

JavaScript | PHP | SQL | MySQL | Vue.js | Node.js / Express | TypeScript | React | C# | C++ | Kotlin | Angular | Laminas | jQuery | Android (Android Studio) | React Native | Git | Docker | UX/UI | Photoshop | HTML | CSS

PROJECTS

[17/07/2025 – 23/07/2025] **Android App**

- Developed a mobile application in Kotlin using Jetpack Compose that interacts with The Cat API to display and manage a list of cat breeds, with features like breed search, detailed views, and favourites management.
- Implemented MVVM architecture and Room database to provide offline support for favourite breeds and ensure clean separation of concerns.

- Integrated Jetpack Navigation and Retrofit for modern UI navigation and API handling, enhancing app responsiveness and modularity.
- Wrote unit tests covering 60% of ViewModel logic, ensuring stability of core app features. Used Git for version control with a clear and structured commit history.

[09/2023 – 11/2023] **File Manager**

- Developed a secure file management system with user authentication using JWT tokens, handling up to 50 user sessions simultaneously.
- Designed and implemented a RESTful API backend with 50+ endpoints, ensuring seamless communication between the frontend and database making use of Node.js, PostgreSQL and Knex.js.
- Containerized the application with Docker, decreasing deployment time by 50% and ensuring consistent environments across multiple systems.
- Managed version control with Git, ensuring structured development and collaboration.
